

9. STATISTICS
Marks Scheme

| Paper | Nomenclature | Marks | |
|-----------|---|----------|----------|
| | | Science | Arts |
| Paper I | Statistical Inference | 50 marks | 65 marks |
| Paper II | Statistical Applications in Society and Industry | 50 marks | 65 marks |
| Paper III | Practical based on Paper I,II | 50 marks | 70 marks |

Dr. Registrar
Academic
University of Rajasthan, Jaipur

| Note: | Total | 150 | 200 Marks |
|---|--------------|------------|------------------|
| In each Question paper, 10 (ten) questions will be set having 2 (Two) from each unit. Candidates have to answer five questions in all, taking not more than one from each unit. | | | |

Paper I

(Statistical Inference)

Unit-I

Sampling from a distribution : Concept of statistic and its sampling distributions. Sampling distribution for mean of Binomial, Poisson and Normal Distribution. Chi-square Distribution: Definition, Moments, MGF, moments, C.G.F., Mode & Skewness, Limiting and Additive Property. Distribution of ratio of chi-square variates. Applications. Testing Normal Population variance, Test for Goodness of fit, Contingency table & independence of attributes, Yate's correction.

18 hours

Unit-II

t-Distribution : Definition of Student's t & Fisher's F Statistic and derivations of the distributions. Constants & Limiting Property of t-distribution. Applications—Testing of Single mean, Difference of two means, paired t-test and sample correlation coefficient. F-Distribution : Definition, Derivation, Constants, Application—Testing of equality of two variances. Relationship between t, F and chi-square Distributions.

18 hours

Unit-III

Theory of Estimation: Point Estimation—Concept and Problem for Point Estimation; Criterion of a good estimator (Unbiasedness, Methods of Maximum likelihood, Consistency, Efficiency, Sufficiency). MVUE. Method of moments. Interval Estimation—Concept, Confidence Interval, Confidence Coefficient, Construction of Confidence Interval for Population Mean, Variance, Difference of Population Means & Ratio of Variances for Normal Distributions.

18 hours

Unit-IV

Testing of Hypothesis: Simple, Composite, Null and Alternative Hypothesis. Types of error, Critical region. BCR, Neyman-Person's Lemma for BCR, BCR in case of Binomial, Poisson, and Normal and Exponential Population.

18 hours

**Dr. Registrar
Academic**

University of Rajasthan

Syllabus : B.Sc. Part-II

Unit-V

Large sample tests-Testing of single mean, proportion. Testing of difference of means and proportions. Non-Parametric Tests-Definition, Merits & Limitations. Sign test for one sample and two sample cases, Run Test, Median test.

18 hours

Paper II

STATISTICAL APPLICATIONS IN SOCIETY AND INDUSTRY

Unit-I

Demographic Methods : Sources of demographic data-census, register, adhoc survey, hospital records, demographic profiles of Indian census. Measurement of mortality-Crude death rates, Infant mortality rates, Death rate by cause, Standardized death rate. Complete life table-Construction and its main features, Mortality rate and probability of dying. Relation between different columns of life table, uses of life table and its limitations. Measurement of fertility.

University of Rajasthan

Crude birth rate, General fertility rate, Specific fertility rate, Total fertility rate, Gross Reproduction Rate, Net Reproduction Rate.

18 hours

Unit-II

Economic Statistics: Index numbers-Definition, Applications of index numbers, Price relatives, Quantity & Value relatives, Link and Chain Relatives. Problems involved in computation of index number, Use of averages; Simple aggregative and Weighted average methods, Laspeyres's, Paasche's and Fisher's index number. Tests for index numbers. Consumer price index.

18 hours

Unit-III

Time Series Analysis: Definition & its different components, illustrations, additive and multiplicative models. Different Methods for determination of trend & seasonal fluctuation along with their merits & demerits.

18 hours

Unit-IV

Educational Statistics: Methods of standardization of scales and tests, Z-scores, t-scores, Standard scores, Percentile score, Intelligence: Quotient and its measurement and uses, Validity of test scores, Reliability of Scores and their determination.

18 hours

Unit-V

Statistical Quality Control: Concept of SQC, Process control & Product control, Causes of variation in quality, General theory of control charts, control limits, subgrouping, Summary of out of control criteria, Control charts for variables, Construction of Mean and Range charts, Concepts of Defects and Defectives, Control Charts for attributes: Construction of np chart, p chart, c chart and their merits and demerits.

Paper III

Practical Paper

1. Tests of significance based on t , Chi-square, F. Testing of significance of sample correlation coefficient. Use of Z-transformation.
2. Large sample tests for means and proportions. Tests of goodness of fit and independence of attributes in contingency tables.
3. Non parametric tests: Sign, Run, Median (for large samples).
4. Computation of mortality and fertility rates. Construction of life table.
5. Construction of Index Numbers by Laspeyre's, Paasche's, Fisher's, Chain Base Indices. Consumer price index.
6. Tests for Index numbers.
7. Determination of trends in a time series and construction of seasonal indices.
8. Drawing of \bar{X} , R, np, p and C-Charts.
